

# Restore and Delete Archived Models

Archiving a model moves it from the Models List tab to the Archives tab. Archived models cannot be opened.

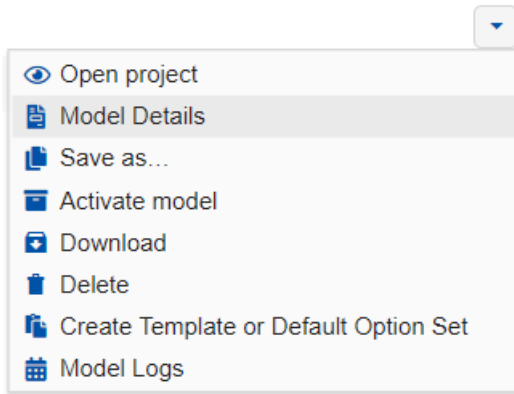

The **Archives** tab lists the models that have been archived from the Models tab. Archived models contain all the model information and participants' judgments. Archived models are not included in the Workgroup's license models count.

Archived models can be **deleted** or **activated**.

Activating an archived model removes it from the Archives list and adds it to the Models tab.

Click the arrow icon to view commands you can choose from.

To **download**, **delete**, or **activate** several archived models at once, use the checkbox to the left to select the models you want, then click the download, delete, or activate button.
