

Introducing Comparison® Release 2020

October 23, 2019 | HTML5 (No Silverlight version)

We are excited to introduce you to Expert Choice Comparison® 2020.

Key improvements:

- Expanded browser support. Comparison 2020 allows you to use any HTML5 supported browsers, which means ALL modern browsers. You no longer need to install any plug-ins or add-ons.
- A revised, simplified user interface, but with an Advanced Mode option for those who need to go deeper into the application.
- Introducing a modern and enhanced Charts display and interface updates.
- New help system. An in-app help widget displays context-sensitive help articles. The help system is fully indexed, searchable, and the entire knowledge base can be opened in a separate window. You can leave help feedback, rate help topics, download a pdf, and more.

*We are providing a **Legacy Comparison site** for you to use in case you need more time to become familiar with the new Comparison interface.*
