Comparion Sample Models and Templates

#### **COMPARION SAMPLE MODELS**

#### What is a Model?

A model is a representation of a decision. Comparion is a structured decision-making tool designed to help organize and analyze various factors based on specific goals and objectives. By providing a clear framework, Comparion models enable more effective and efficient decision-making.

Models are tailored to fit the unique needs of your project Model includes clearly defined objectives, goals, and alternatives. Participants have already been added, evaluations have been completed, and results have been synthesized for training purposes.

#### How to add Sample Models into Expert Choice Comparion

# Steps to Add Sample Models:

- 1. Download the Sample Model File:
  - 1. Click on the link to download a sample model file.
  - 2. Save the file to your computer. By default, the model file will be saved in your downloads folder.
- 2. Upload the Sample Model into Comparion:
  - 1. Select the target workgroup.
  - 2. Go to the Manage Models tab or go to Home in the new UI
  - 3. Click the "New from File" button.
  - 4. Select the file you downloaded to upload the model.

**Note:** To add sample models to your workgroup in Comparion, please refer to Add Comparion Sample Models to Workgroup page for step-by-step instructions and additional details. This process allows Workgroup Managers to browse and select from a library of sample models or templates and add them to their workgroup for further use.

### Templates in Your Workgroup

Your workgroup may also contain templates designed to simplify the process of creating models. These templates are predefined setups that can be customized further based on your project's requirements. For more information on templates, visit the Sample Templates Help Center.

# **COMPARION SAMPLE TEMPLATES**

Comparion "templates" serves as a quick and convenient starting point for building models, ensuring consistency and ease of use across projects. Templates provide the foundational structure for models without including participant information, data, or results.

Below are templates designed for common use cases. Additionally, yournay create your own templates from existing workgroup models by selecting the dropdown menu next to each model.

#### **Comparion Sample Templates**

APPLICATION (PURPOSE)	MODEL TEMPLATES	INDUSTRY
