

March 6, 2020

March 6, 2020 | Version 6.0.011.38825

Enhancements

- Improvements in Synthesize Charts Toolbar:

- Made the chart types a drop-down option
- Added chart option labels for better understanding

- Rearranged the buttons on the Invite Participants page to group related actions

- In addition to being able to copy and paste the Time Periods columns, Time periods rows can now be copied and pasted from one row to another.

ID	Projects	Cost	2017 (1) Copy Paste	2018 (2) Copy Paste	2019 (3) Copy Paste
18	16c. Customer Service Call Center - Bronze	800	800		
17	16b. Customer Service Call Center - Silver	890	890		
16	16a. Customer Service Call Center - Gold	1,182	1,182	0	
15	15. Multi factor authentication	490	490		
14	14. SRDF Site/Service	3,440	3,440		
13	13. Sales Force Laptops	150	150		
12	12. Building access system upgrade	2,300	2,300		
11	11. Salesforce.com Corporate Portal	1,345	1,020	162	162
10	10. PeopleSoft Upgrade	1,670	1,670		
9	09. Oracle 12 Upgrade	1,890	1,890		

Bug Fixes

- Fixed the issue when importing Custom Constraints from Categorical Alternative Attributes.
- Fixed the default pairwise wording when uploading Comparison desktop (.ahpz) file. The default wording is now "is more important" for Objectives and "is more preferable" for Alternatives.
- Fixed the syncing issue in the Alternatives and Resource Allocation pages.
- Fixed issues in TeamTime Brainstorming:
 - Difficulty adding/dragging elements that have names with non-English characters.
 - Can't detect disconnected users, thus the total number of Online Participants was incorrect
 - Inconsistent hint when adding Pros and Cons.
- Fixed issue when resizing information document frames when the mode is switched from Tooltip to Frame View.
- Fixed the missing upload image button when editing the Quick Help for small devices.
- Fixed the saving of zero data for Step Function and Utility Curve measurement methods.
