

# March 20, 2020

March 20, 2020 | Version 6.0.13.38923

## New Features/Enhancements

- Resource Aligner's Time Periods: Option to synchronize the Min and Max entered on the first period to all the subsequent periods. This is available from Portfolio View > Time Periods mode.

15	15. Multi factor authentication	2,100	2,100		
16	16a. Customer Service Call Center - Gold	980		490	490
17	16b. Customer Service Call Center - Silver	890	890

43227			z.bayta@eversun.ph	Modify	Project	3300-8635	Edit timeperiods

- Added a search/filter row for applicable columns.
- Added a date picker on the Date column.
- Added a Reset Filters button.

## Bug Fixes

- Fixed the slight difference in the priority displayed on Step Function and Utility Curve evaluation graph for some judgments. The saved priority is correct, only the display has around 0.01 difference.
- Fixed the Snapshot name when editing Cost and Risk.
- Removed the required Time when using the date picker from the Model's list.
- Fixed issues when switching from Advanced mode to non-advanced mode in the Models List.
  - The Filter row is still displayed even when the user already switched back to non-advanced mode. This should be reset.
  - The Favorites column is flashing as an Advanced option.
