# Enhancements

## • Export Objectives Hierarchy View

Added a "Save as Image" option on the Objectives hierarchy view. This will export the hierarchy in .png format

-						-

## • "Add from predefined sets" when creating a model

Added a checkbox "Add from predefined sets" when creating a new model. Checking this will redirect the Project Manager to the Objectives page with the "Add from predefined sets" window open.

	Add objectives from predefined s			
	Objective Sets	Please select items to add:	A Search	
	Consulting Candidate Selection	Objectives	Description	
del ×	Flight Security	Goal: Select Best Consultant		
×	IT Portfolio Optimization	Able to overcome obstacles		
	Sexual Harassment Policy	Logical thought process		
	Coxua Hardsanoni Fondy	Solid Communication skills		
		Speaking		
		Writing		
4		Listening		
		Able to use of facts and data		
ves *		Team Player		
d sets of objectives		Good Leader		
ates		Strong Interpersonal Skills		
Create Close		Math skills

## Charts Font Setting

- Change the font settings to a dropdown instead of the decrease/increase A icons
- Added the "Auto font size" checkbox for column charts (automatically select the best font size for column chart type)

14 - Default CAuto font s 8 10	ize	CAA
12 14 - Default

Moved the evaluation options pages to the Collect Input tab

These pages were moved from the "Define Model" tab to the "Collect Input " tab

MANAGE MODELS		<b>=</b>	COLLECTINPUT		<u> </u>
		¥.			
Evaluation status					
Evaluation Options					
Udgment Options					
🔹 🏟 Participant display	options				
Evaluation settings					
🔒 Anytime Evaluation					
🖄 Send Invitations		0			
🔒 Collect my input		0	Participant Nam	ie	

Consistent naming for Evaluation Status on the landing page and menu

- Renamed the "Overall Evaluation Progress" to "Evaluation Status" to match what's on the left menu
- Added a hotlink to make it obvious that the Project Manager can go to the Evaluation Progress page by clicking

• Show Objectives Index on the Define Model > Objectives page

## Expert Choice Comparion® Help Document

#### · Reset option on each Dashboard's Sensitivity Panel

We've added a Reset button on each of the sensitive panels, previously the reset button was only available from the main Dashboard toolbar at the top

## • Enhancements on Quick Help

- Added text-to-speech option on Quick Help pop-out
- Changed the pop-out heading background to orange (from blue)
- Made the pop-out window wider
- Allowed to display QH more than once when going to a forward step (previously we only displayed QH once in a session)
- Made the equal bar for PW Verbal darker

### • Enhancement of Multi-pairwise evaluation

· After entering a judgment, auto-select the next unassessed pair (previously we auto-select the next pair regardless if

- it is evaluated or not)
- · Show/hide the priority bars and normalization dropdown on the evaluation's results steps

· Confirmation prompt when deleting participants from the Workgroup Participants page

Confir	mation						
Are you sure you want to remove selected participants?							
	Yes	No					

Use Baron Solver on Resource Aligner

## **Bug Fixes**

- · Fixed the chart labels when they were displayed at the bottom
- · Hid the heading on the inconsistency improvement step since it is not applicable

			ALLOCATE	DASHBOARDS			2
	You have	completed prior	itizing your objec	ctives with respect	to "Goal: Optim	ize IT Portfolio To Improv	/e Performance" 🜔 📣
		Priority of	f objectives with res	spect to "Goal: Optimiz	e IT Portfolio To I	mprove Performance"	
-	Click here to review all your judgments						
	Click here if you think the inconsistency is too high						
	If you think the priorities are not reasonable then:						
	Click here if you would like to redo a judgment for one pair of elements						
						Cancel	

- Fixed issue with not being able to edit participant name when there are < > characters
- Fixed issues on the exported image file of Sensitivity Charts
  - Labels on the exported image file are too small compared to the actual labels displayed on the page
  - Bottom labels are not showing as expected
  - Missing labels for Pie, Donut, and Hierarchical Pie Charts
