August 31, 2022 | Version 6.11.3 (5533c05e43ac)

Bug Fixes

- Fixed issue with not being able to leave the insight survey step when the Objectives/Alternatives checklist question is required
- Fixed issue for the Viewer Role users being allowed to access the Evaluation Progress screen
- Fixed the Collaborative Structuring drawing mode that is not working for participants
- Fixed the white screen on Mixed Sensitivity when selecting a widget
- Fixed the Step Function curve not showing correctly on the TeamTime meeting
- Fixed issue when deleting an objective node from the right-click command
- Fixed issue when blank objective nodes are being allowed to be added
- Fixed the Relevant constraints report to include constraints for time periods
- Fixed the Workgroup List export (admin)
- Fixed the typo error on the RA soft constraints tooltip

Minor Enhancement

- Remember the "collapse" or "expand" state of the objectives hierarchy on the Measurement Methods screen
