

Gamma 2022

September 22, 2022 Version 6.11.3 (8d16937bec40)

Bug Fixes

- Provide proper validation when adding participants without an e-mail address.
- Hid the export button on the Page Lookup dialog. The export button should only be available to the admin.
- Fixed the extending slider on Step Function / Utility Curve evaluation when the objective name is long
- Fixed the sort by priority on the evaluation's dynamic sensitivity
- Fixed the incorrect label on evaluation sensitivities when individual results are displayed (before the fix, All Participants is displayed)
- Fixed to show the User Priority checkbox only when some priorities are defined
- Allow going to the next step when a checklist question is not required, even if there is a minimum specified
- Fixed the incorrect normalization on the Dashboard (ongoing)
- Fixed the Contributions grid not showing correctly for the Firefox browser
- Fixed the unnecessary scrolls on Dashboard panels
- Fixed the incorrect question heading variables
- Do not allow the Project Organizers to upgrade evaluators as a Project Manager (Project Organizer)
- Do not include Deleted and Archived models on the license count
- Fix for Time Period durations pagination (only supports 20 projects per page)"
- Team Time Fixes"

Enhancements

- Allow costs to be pasted in from the Identify > Alternatives page
 - Allow to re-order columns on the Identify > Alternatives page
-
