

# Anytime versus TeamTime™ Decision Making & Measurement Definition

In addition to defining the “measurement type” for each decision node, Project Managers can set one of 2 modes to make judgments about objectives (criteria) and alternatives (projects): **Anytime or TeamTime™** on the Collect Input screen:

## AnyTime Evaluation

**Anytime** is an asynchronous mode and permits evaluators to make judgments at any time and any place.

## TeamTime™ Evaluation

TeamTime™ is a synchronous mode, led by the Project Manager, where participants enter their judgments one at a time, using their personal computer. Some participants can be in a room with the project manager, while other participants can be in different locations using their laptops over the Internet.

Movement from judgment to judgment on the evaluators' screens is controlled by the Project Manager. This process allows a real-time discussion of the elements being evaluated.

### START/STOP MEETING

Model: Boeing Strategic Market BCG  
 TeamTime™ Meeting in Progress. Meeting ID: 522-695-970  
 Logged in as: Project Manager

With respect to Goal: Determine Best Market for Boeing Strategy, which of the two Objectives below is more important

Goal: Determine Best Market for Boeing Strategy

Boeing Vs. Airbus

Airbus, a formidable four nation consortium, is threatening the commercial jet aircraft market dominated by Boeing. Factors fueling this competition involve the changing nature of airline needs and the international business environment. This model evaluates the market attractiveness and competitive strength for Boeing in four global markets. Market attractiveness is emphasized.

	MARKET ATTRACTIVENESS	COMPETITIVE STRENGTH
Project Manager	1.90	1.00
User 21232f29	1.00	1.78
Professor Forman	1.00	1.20
User 64b020f0	1.70	1.00
Group Result:	1.11	1.00

Geometric variance: 21.95%

Navigation Box: Steps: 1 2 3 4 5 6 7 8 9 ... 219 Evaluated: 1/181

Time since last judgment: 0:02  
 Last request: 4:17:03 PM  
 Current time: 4:17:03 PM
