Install Expert Choice Self host instance

To install Comparion:

- Make sure you have saved **setup.ini**, and then
- Open a Powershell prompt with elevated Administrator privileges.
- Navigate to the install directory where **SelfHostSetup.ps1** is located.
- Make sure your system can run powershell signed scripts by executing **Set-ExecutionPolicy -ExecutionPolicy RemoteSigned**.
- Execute `.\SelfHostSetup.ps1'. Two or three errors is normal; errors all the way through is not normal.
- After the script is finished, browse to that you specified in Configuration.
- It may take a while for the system to initialize and detect no database is found. This is normal.
- If the site does not load, refer to this Troubleshooting page.
