

July 1, 2024

July 1, 2024 | Version 6.18.1 (93c6de188)

Enhancement

- Ability to change the number of decimals to display on Portfolio Canvas. This setting is in effect for costs and custom constraints. For priorities, it will still be 4 decimal places.

Bug Fixes

- Fixed the unnecessary hiding of the Custom Constraints columns. This used to happen when ignoring the custom constraints, even the option to hide ignore constraints is off – additionally, the columns remain hidden when un-ignoring the constraints.
 - Fixed the invalid numbers showing for blank custom constraint cells (was reproducible for some old models).
-
