

Patents

Expert Choice has filed for patents to protect the following inventions. This listing includes pending patent applications and patents that have already been granted by the United States Patent and Trademark Office (USPTO).

Product Name	Patent Number/ Publication Number*	Name	Type
Comparison	7379934	Data mapping	Granted
	7509231	Measuring and displaying performance, earned value and/or risk	Granted
	20150199635*	Method and a system for deriving changes in overall alternative priorities in response to changes in alternative priorities with respect to objectives	Pending
Riskion	7379934	Data mapping	Granted
	7509231	Measuring and displaying performance, earned value and/or risk	Granted
	20140350999*	System and a method for providing risk management	Pending
	20150199635*	Method and a system for deriving changes in overall alternative priorities in response to changes in alternative priorities with respect to objectives	Pending
	10360524	System and a method for providing risk management	Granted
	11436545	System and a method for calculating monetary value of risk from a hierarchy of objectives	Granted
	20240320386	System and a method for correcting inflated computed risk estimates by employing monte carlo simulations	Pending
