

Patents

Expert Choice has filed for patents to protect the following inventions. This listing includes pending patent applications and patents that have already been granted by the United States Patent and Trademark Office (USPTO).

Publication Numbers	Title	Legal Status
US20240320386	System and a method for correcting inflated computed risk estimates by employing Monte Carlo simulations	Pending
US20200193350	System and a method for calculating monetary value of risk from a hierarchy of objectives	Granted
US11436545	System and a method for calculating monetary value of risk from a hierarchy of objectives	Granted
US20150199635	Method and a system for deriving changes in overall alternative priorities in response to changes in alternative priorities with respect to objectives	Lapsed
US20140350999	System and a method for providing risk management	Granted
10360524	System and a method for providing risk management	Granted
7509231	Measuring and displaying performance, earned value and/or risk	Lapsed
7379934	Data mapping	Lapsed
WO01/20530	Method and system for network-based decision processing and for matching requests for proposals to responses	Lapsed
AU7495900	Method and system for network-based decision processing and for matching requests for proposals to responses	Lapsed
WO01/08070	Method and system of converting data and judgments to values or priorities	Lapsed
AU6367400	Method and system of converting data and judgments to values or priorities	Lapsed
US6850891	Method and system of converting data and judgements to values or priorities	Lapsed
US6067719	Ratio ruler for comparative judgments	Lapsed
US5995728	Computer implemented method of generating and displaying objectives from pros and cons for evaluating decision alternatives	Lapsed
US4613946	Method and apparatus for generating hierarchical displays	Expired
